HANDY REFERENCE
ATLAS
OF THE WORLD

BY JOHN BARTHOLOMEW
F.R.G.S., ETC.

*WITH COMPLETE INDEX
AND GEOGRAPHICAL STATISTICS*

LONDON:
JOHN WALKER & Co.
FARRINGTON HOUSE, WARWICK LANE, E.C.

1888

Preface.

ALTHOUGH there are many complete and elaborate Atlases of the World they are all more or less in such a large and unwieldy form, that reference to them, whilst reading a newspaper or book, usually involves a considerable amount of trouble.

In the present work, the special aim has been to obviate this inconvenience to the public by providing an Atlas which, for all general purposes, is practically quite complete and perfectly reliable, while at the same time, in such a convenient and handy form that it may be kept on a writing-table or a book-shelf for ready consultation.

The collection of maps, which is extensive and varied, will be found to present a trustworthy representation of the physical and political geography of all the countries of the world. British Colonies and Possessions have been treated in exceptional detail; and several original maps have been inserted to illustrate the most prominent features in Physical and Commercial Geography.

Accuracy, combined with clearness and legibility, have been the chief objects kept in view in the preparation of the maps; the latest authorities have been consulted, and all information has been carefully brought up to date.

The general utility of the Atlas has been increased by the addition of the most recent geographical statistics of the various States of the World, together with an Index of about fifteen thousand names.
